

Super Stallette

The new generation of portable hot water hand wash stations The Super Stallette.

The Best Hot Water Hand Wash in the World

The exciting Super Stallette S S230 is the latest version of the ever popular TEAL Stallette hot water hand wash station.

Using the latest technology and needing just a 10 amp socket for operation, Super Stallette is fully automatic – there is nothing to reset, nothing to adjust – just a perfect 10 second hot wash every time (Temperature 40°C +/- 2°C).

Now Super Tough, the Super Stallette has an entirely new light weight body designed to stand up to all the hard knocks that a portable unit can receive in real life.

With a blue 'ready' light on - just nudge the button with your knee and in 3 to 4 seconds, get 10 seconds of the best hot wash ever.

Entirely self contained the Super Stallette gives up to 50 hot washes per filling of the TEALTainer™ which hygienically stores both fresh and waste water in separately secure compartments.

The clever TEAL design means that the unique spray head not only gives perfect hand coverage but also ensures that every drop of water is used economically. This creates huge savings in water and as you only heat the water that you use, there is a massive reduction in energy costs.

TEAL make a truly comprehensive range of portable and mobile hot water hand wash units and have been acknowledged experts in the field for more than 50 years. See the TEAL web site:- www.transplumb.com.au

The Best Hot Water Hand Wash in the World

Teal
No plumbing

Specification for SS230

2 metre power lead complete with moulded 10 amp fused plug for 220/240v 50 cycle AC supply.

Stallette Variant (SSV230)

Super Stallette is also available in kit form for 'Built-in' applications.

The kit includes all the standard components except the moulded body but with the addition of a stainless steel bowl and the nudge switch in a water proof box on flexible conduit.

Medical

Super Stallette is suitable for medical and healthcare use. Unlike conventional 'plumbed-in' handwash basins, there is no need for concern about water born infections such as Legionella. A simple disinfection routine, as developed in conjunction with the Hospital Infection Research Laboratory for the TEAL Hygienius, should be used on every other day for total hygiene security.

Teal

50 years of Progress

- TEAL only manufacture portable and mobile hot water hand wash units that need no plumbing and deliver this type of product all over the world.
 - TEAL draws on 50 years experience and have an aggressive policy of innovation and continuous improvement.
 - TEAL units are used throughout the British Army's soft walled medical facilities making sure that our boys in Peace Keeping Forces all over the World are safe from Hospital Acquired Infections.
 - Production of hot water hand wash units exceeds 12,000 per annum and TEAL are now the largest manufacturer of this kind of unit in the World.
 - TEAL units are a boon to many industries and are used in NHS Hospitals, patient clinics, market stalls, fast food outlets, service vans, waste vehicles, etc.
- In fact, anywhere where there is a need for Hygienically clean hands.
